How would you dislodge the stalemate in Congress over healthcare?

With the corrupt party leadership blocking all other voices and blocking all other palatable solutions from their own party. It is my goals to reach out to democrats as to what they would like to see, while staying firm in my principles. Then I will reach out to republicans such as Dr Senator Rand Paul and Rep Thomas Massey and either add to or promote their repeal of Obamacare altogether. Just imagine how successful I would be as the first independent to win in the most republican districts in the most republican state in all of the country? Just imagine my success as I reference my own situation as a type one diabetic self employed businessman that has been seriously hurt by government's involvement in healthcare? Together as independent americans we can retake the people's seat and restore America once more.

Should current campaign finance laws be revised? Why or why not?

Yes, regarding corporations (for corporations are not people) and pac funds. Other than that the laws are extremely convoluted and needs to be made simple and easy for all to understand as to what is the law. We also need to enforce the Freedom of Information Act.

What can Congress do to ensure that all children, regardless of economic status, have access to quality education? What is the proper role of the federal government in education?

Enforce the Constitution and abolish the US Department of Education. Not only is education a States rights issue, but it belongs to the family/community levels. Empower the parents and teachers by getting rid of as much government intervention as possible.

Tax reform will be brought before Congress. What are your priorities?

Sharpen the double edge axe and cut through all of the taxes, regulations, and overall government that is hampering our economy and our freedoms. Let the Constitution be my guide in this process.

A draft report produced by 13 federal agencies calls the long-term evidence that global warming is being driven by human activities "unambiguous." What are the most effective ways to meet the challenges of climate change?

If these so called reports can be trusted as being factual. Then we must cut government regulations, subsidies, taxes, and allow the free market to reign once more. Tesla a free market company has the technology where they could construct a solar power plant in the upper square of Texas and produce enough power for the entire country.

How do you balance concerns about voting security against limiting the right to vote?

First and foremost we must eliminate the voting fraud that occurs not only at the federal levels, but also the local State and local areas as well. For example Utah has violated several laws on the books, Utah's election laws are so convoluted, Utah's top republican leaders loves to suppress all efforts of the fastest growing party in this State

(Independent American Party). Let's fix the election fraud then lets worry about the rest.
